

Experience the fast and easy way of programming!

Each Starter Set contains:

1 x easyE4 Basic Device

The easyE4 control relay offers a solution for everyone who wants to implement control tasks with as little effort as possible. The easyE4 has powerful hardware and can be flexibly expanded by up to 11 modules to a maximum of 188 inputs/outputs. The base units and expansion modules in the UC, DC and AC (later available) variants offer a wide range of voltages in a compact range. The devices can be combined in any required way.

The Ethernet interface on board not only enables visualization on HMIs - it also opens the door to IIoT applications. In addition, the integrated web server offers the possibility of visualisation on mobile devices.

1 x License easySoft version 7

The intuitive software easySoft provides a quick introduction to programming. Version 7 provides four different programming languages (LD, EDP, FBD, ST). In addition to clear selection menus, the possibility of simulation as well as online communication, the easySoft 7 offers new function blocks, such as the interrupt and the data logger, which ensure convenient and reliable operation.

1 x Patch cable RJ45

With the network cable, your easyE4 is ready to go and can be integrated into Ethernet networks.

1 x Flyer easyE4

The most important information about easyE4 at a glance!

My Order (please select)

Package 1: EASY-BOX-E4-UC1

- Basic device EASYE4-UC-12RC1
- 24 V AC, 12/24 V DC, 8 digital inputs, 4 outputs (Relay 8 A)
- Programming software easySoft V7
- Patch cable RJ45
- Flyer easyE4

Order no.: 197227

77,-€

Package 2: EASY-BOX-E4-DC1

- Basic device EASYE4-DC-12TC1
- 24 V DC, 8 digital inputs, 4 outputs (Transistor 0,5 A)
- Programming software easySoft V7
- Patch cable RJ45
- Flyer easyE4

Order no.: 197228

77,-€
